Adjusted Financial Measures (Non-IFRS)

In addition to the financial information presented in accordance with IFRS, this press release includes the following adjusted non-IFRS metrics: adjusted gross profit, adjusted operating profit, adjusted net income (loss), adjusted diluted earnings (loss) per share and adjusted EBITDA. We define adjusted gross profit as gross profit adjusted for share-based compensation expense. We define adjusted operating profit as profit from operations adjusted for share-based compensation expense. We define adjusted net income (loss) as net income (loss) adjusted for share-based compensation expense. We define adjusted diluted EPS as adjusted net income (loss) divided by the dilutive shares. We define adjusted EBITDA as net income (loss), excluding the impact of finance expense, income tax expense, depreciation, amortization, share-based compensation expense, transaction gains and associated expenses, restructuring charges and litigation settlements.

We believe that in addition to our results determined in accordance with IFRS, these adjusted non-IFRS measures provide useful information to both

management and investors in measuring our financial performance and highlight trends in our business that may not otherwise be apparent when relying solely on IFRS measures. These adjusted non-IFRS financial measures provide supplemental information regarding our operating performance that excludes certain gains, losses and non-cash charges that occur relatively infrequently and/or that we consider to be unrelated to our core operations. For further information regarding these non-IFRS measures, please refer to "Unaudited Reconciliation of IFRS to Adjusted Non-IFRS" table above.

Adjusted non-IFRS financial information is presented for supplemental informational purposes only and should not be considered in isolation or as a substitute for financial information presented in accordance with IFRS. Our presentation of adjusted non-IFRS measures should not be construed as an inference that our future results will be unaffected by unusual or nonrecurring items. Other companies in our industry may calculate these measures differently, which may limit their usefulness as a comparative measure.
